

changing the way patients manage pain.

## One Active System. Two OrthoPods.

The OrthoCor Active System is indicated for adjunctive use in the palliative treatment of post-operative pain and edema in superficial soft tissue. The Active System temporarily relieves minor muscle and joint aches and pain associated with overexertion, strains, sprains, and arthritis.

### Features & Benefits:

- non-invasive wearable therapy
- significant reduction in pain
- clinically-proven to speed up post-op recovery
- a treatment with no-side effects
- contributes to the reduction in opioid dependency
- drug-free pain relief

### Conditions treated:

- post-operative pain
- swelling
- chronic pain

### Technology:

FDA-Cleared — \*Made in USA

### Clinically Proven Results

- ✓ 60% reduction in multiple pain sites<sup>1</sup>
- ✓ 55% reduction in pain medication use<sup>2</sup>
- ✓ 7x faster reduction in acute injury induced edema (swelling)<sup>3</sup>
